---------------------- 4 in 1 Folder Locker is a small, yet reliable program which allows you to protect important files that you store on your computer, by blocking unauthorised users' access to the document path. In other words, the software can lock folders or even the drives on your system, thus restricting the access of other users to it. Several methods for file protection 4 in 1 Folder Locker allows you to apply a powerful protection system, in order to block users from accessing files on your computer. Thus, not only can it lock folders, but it can also block the access to any drive on your computer, or even the entire hard disk. Once you lock a folder/drive, they become inaccessible even to the user who performed the security encryption. The only way to easily unlock them is to use 4 in 1 Folder Locker, since the software can reverse the encryption. Password protection and file encryption The access to the program's interface is also blocked, thus ensuring a higher folder security. You need to log in in order to gain access to the list of locked folders and to perform the reverse process. The software supports several users, each with a given name and password, but you can only create a new account as long as you are logged in. Once you log in, you can access the list of locked folders/drives, block more paths or unlock the existing ones. The table displays the name of the folder, its complete path and the date when it was locked. Small, simple application If you wish for a simple method of protecting your computer from unwanted access or of encrypting files, 4 in 1 Folder Locker offers you a suitable solution. The software is lightweight, password protected and capable of locking folders or drives. Moreover, you can use it in order to encrypt/decrypt files.
